

NUEVAS TECNOLOGÍAS DE SOLDADURA S.L. (Newtesol) obtains the ASME Nuclear Stamp

The company Nuevas Tecnologías de Soldadura S.L. (Newtesol) located in Gajano (Cantabria) and dedicated to the welding engineering has obtained the international NPT Stamp of the American Society of Mechanical Engineers (ASME). This stamp entitles Newtesol to manufacture high-tech nuclear parts for any type of nuclear plant, both in a national and international level.

This is the first time that a medium-sized private company, like Nuevas Tecnologías de Soldadura S.L. (Newtesol), gets this certification in Spain. The obtaining of this type of nuclear stamp represents the acknowledgment of a structure with a high technological level and an exhaustive quality system that guarantees product quality of the products provided by Newtesol to the nuclear industry.
